-  Fixed American Oak shelving for optimum capacity
-  Security lock
-  Digital temperature display with touch controls
-  Inverter compressor
-  Premium strip LED lighting
-  Audio and visual alarm
-  Winter function (heating system)
-  Sabbath mode

Multi-Temp

Vintec versatile Multi-Temp technology is designed for serving different varietals at their perfect individual drinking temperatures. It provides a gradient of temperature throughout the cabinet, which is ideal for keeping all wine styles at their optimal drinking temperature.

Stable Temperature

Our wine cabinets maintain a stable temperature to keep your wine in perfect cellaring conditions. This is thanks to double glazed glass, insulated side panels and interactions between a compressor and thermostat. (Digital display varies by model)

Winter Heating Function

In some areas, the temperature in winter could drop drastically. Our wine cabinets are equipped with a heating function to deliver a constant temperature through the cellar all year round.

UV Protected Dark Storage Area

UV rays negatively impact the quality of your wine. Our cabinets eliminate this threat by incorporating UV treated tinted glass doors, dark interiors and dimmed internal LED lights.

No Vibration

To protect the storage life and quality of your wine, our cabinets have been designed to create a vibration proof environment by including an externally housed compressor, rubber shock absorbers and vibration absorbing wooden shelves.

Premium Multi-Temp Wine Cellars 198 Bottle Wine Cabinet
